

**IN THE CLAIMS:**

Please amend the claims as follows.

28. A system unit according to claim [16] 26, wherein said at least one subsystem includes said memory subsystem for storing data within a portion of said global address range, said system unit further comprising:

at least one shared-memory address register receiving from said computer controller a value defining a shared range of memory addresses within said portion of said global range,

said comparator being further responsive to said shared-memory address register for inhibiting said memory subsystem when said each address lies outside said shared range.

Please cancel claims 50-52.
